

26th October 2017

Cobar Power Monitoring of Feeders 1 & 2

To manually extract data from the Power Monitoring devices for feeders 1 & 2 please follow the Steps below.

- 1) Push Ent Button 
Until you reach IA.
- 2) Push Down arrow 
Until you reach Real Power 3P
- 3) Take down reading in KW
- 4) Push Down arrow 
Again until you reach Apparent Power 3P
- 5) Take down reading in KVA

Take readings every 2 hours for Feeder 1 (B101), Feeder 2 (B104) and Winder 1 (B66)

Add Feeder 1 & Feeder 2 values. If the combined total is reaching 23MVA then stop commissioning and notify CSA superintendent.

Note: Please fill in required details in Power Monitoring Spreadsheet.
